

THEFINGER™

Tubing and Cable Manager

What do you currently use to manage suction tubing and cables during a surgical procedure?

AlleSet developed The Finger™ after taking a novel approach to the challenge of managing tubing and cables. A logical, inexpensive restraint that you can place at any position on the surgical drape.

- One-Piece Design
- Adjustable Capacity: Holds up to three pieces of suction tubing.
- Secure: Performs better than two piece designs.
- Cost-Effective: One-Piece Design + Automation = Low Cost
- Eco-Friendly: Less Material = Less Waste
- Latex Free
